## DETAILED ACTION

### *Election/Restrictions*

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-21, 23-41 and 43-58 drawn to an organic light emissive device.

Group II, claim(s) 22, drawn to a method for improving the uniformity of current density of an organic light emitting device.

Group III, claim(s) 42, drawn to a method for forming an electrode.

2. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because: Claim 1 obvious over or anticipated by EP 0901176.

Accordingly, the special technical feature linking the two inventions, an organic light emissive device, does not provide a contribution over the prior art, and no single general inventive concept exists. Therefore, restriction is appropriate.

3. A telephone call was made to Therese A. Hendricks on January 23, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 1774

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
